

How to run:

2 ways:

Non-github

create a directory named Lab1_TicTacToe
add Board.java, Game.java, Main.java, Player.java, and runGame.sh
to the directory

In the terminal navigate to the Lab1_TicTacToe directory you just
made

Run the following in the terminal:

chmod u+x runGame.sh

Then run the following in the terminal:

./runGame.sh

Github:

clone the below repository to a directory of your choice
github repository link: [https://github.com/SpencerPresley/COSC330/
tree/main/Lab1_TicTacToe](https://github.com/SpencerPresley/COSC330/tree/main/Lab1_TicTacToe)

Via the terminal, navigate to the repository directory
(Lab1_TicTacToe)

Run the following in the terminal:

chmod u+x runGame.sh

Then run the following in the terminal:

./runGame.sh

Have fun!
